

Ecology Project *(Friends of Fort Williams Park)*

The Ecology Project is a long-term, park-wide effort to improve the ecological health and sustainability of Fort Williams Park, resulting in a greater variety and abundance of pollinators and birds, increased natural beauty, and a heightened sense of exploration and discovery for people.

- Reduce and control invasive plant and insect populations
- Preserve and expand native plant communities and increase biodiversity
- Improve open space and access for passive recreation
- Foster collaboration, community participation and stewardship
- Provide opportunities for environmental education
